

## Creating a fillet:

A fillet connects two objects with an arc that is tangent to the objects.

### Method 1:

1. Select the fillet symbol  from the modify menu.
2. Type **R** to specify the fillet radius.
3. Enter the radius
4. Select the **first** and **second** intersected line, object or polyline you want to fillet.
5. Hit **Enter**.

### Method 2:

1. Type **FILLET** or **F** in the command line.
2. Type **R** to specify the fillet radius.
3. Enter the radius
4. Select the **first** and **second** intersected line, object or polyline you want to fillet.
5. Hit **Enter**.
